

BCE Global: Working together for a greener future

BCE Global, a Bell Canada company considers sustainability, environmental protection and energy efficiency integral parts of doing business.

Serious about change: environmental targets

1

-  Carbon footprint reduction
-  Energy consumption
-  Waste management
-  Electronic device recovery

BCE Global strives to save energy and reduce associated Greenhouse Gas emissions, among other targets.

2

-  Increasing electricity efficiency at Bell facilities
-  Reducing company vehicles' fuel consumption
-  Using business travel alternatives
-  Training on environmental issues
-  Managing impact of the network
-  Assessing suppliers for environmental sustainability

Striving to reduce negative impacts on the environment

Leading sustainability efforts

3
